

## JOB POSITION

# Commissioning Engineer & Commissioning Supervisor

## Job Description

We are currently looking for a qualified Commissioning Engineers & Commissioning Supervisors to join our dynamic team for a project based near Erfurt, Germany. In this role, you will be responsible for overseeing and managing the commissioning phase of various construction projects, ensuring that all systems and components are tested, operational, and meet project requirements.

## Key Responsibilities:

1. Oversee and manage the commissioning process for all project systems and components.
2. Develop and implement commissioning plans, procedures, and checklists.
3. Collaborate with project teams to ensure all systems are tested and verified according to specifications.
4. Conduct functional performance testing and system verification.
5. Identify, document, and resolve any issues or discrepancies during the commissioning phase.
6. Generate detailed commissioning reports, documenting findings, and recommendations.

7. Coordinate with contractors, project managers, and other stakeholders to ensure successful project completion.
8. Ensure compliance with relevant industry standards and regulations.
9. Provide technical support and guidance to the project team.

## Requirements

- Proven experience as a Commissioning Engineer or Supervisor, or in a similar role.
- Strong understanding of commissioning processes and procedures.
- Familiarity with construction project management and system testing.
- Excellent problem-solving and analytical skills.
- Strong communication and interpersonal abilities.
- Certification in commissioning is a plus.
- Proficiency in English is mandatory; knowledge of the German language is considered a benefit.
